EDUCATION

National University of Science and Technology

Islamabad

Bachelor of Science in Computer Science

EXPERIENCE

Golang Backend Developer

January 2026 – Present

Ibanera LLC

Miami, Florida, US

- Developed and maintained backend services using Golang, supporting 20+ fintech products at Ibanera LLC
- Optimized transaction routing system, improving performance to handle 5+ intermediary routes

Software Engineer (Remote)

September 2024 — December 2025

Bitsmiths Studios

Wyoming, USA

- Led end-to-end development of two+ production web applications using Next.js, contributing across frontend components and Node.js backend services
- Designed and integrated REST APIs for authentication, third-party services, and frontend-backend communication
- Integrated fintech and communication services including Stripe, PayPal, Twilio, and Yoti, enabling secure payments, messaging, and identity verification
- Implemented real-time features such as live chat using Supabase Realtime, supporting distributed clients
- Built and maintained PostgreSQL data models using Prisma and Drizzle for transactional systems
- Developed flexible content and component systems such as Directus CMS, enabling non-technical content management
- Managed deployments on Coolify and implemented React Query and Zustand for efficient state and data handling
- Collaborated with remote product and engineering teams using Git and Agile practices for scalable feature delivery under tight deadlines

Software Engineer

June 2024 — October 2024

GoSaaS Labs

Lahore

- Development of a centralized reporting microservice unifying data across multiple GoSaaS products, built with Node.js, PostgreSQL, and Knex for scalable backend performance
- Developed a TypeScript-based React frontend using MUI, ensuring design consistency and intuitive user experiences aligned with company UI standards
- Implemented robust form validation via React Hook Form and Zod, enhancing data integrity and user input reliability
- Designed and deployed BullMQ-driven task queues, including a priority system to balance heavy workloads and prevent service bottlenecks
- Created database adapters for PostgreSQL and Oracle, and storage adapters for AWS S3, enabling secure, scalable data flow and report delivery
- Utilized XLS transformations and custom parsing logic to process, format, and export complex structured data outputs

Front-End Web Developer

September 2023 — December 2023

Al Raheem Technologies

Islamabad

- Built Angular-based interfaces for a lift management platform, ensuring responsive and maintainable front-end architecture
- Worked with design and backend teams to translate UX/UI principles into production-ready components

TECHNICAL SKILLS

Frontend React, Next.js, TypeScript, Tailwind CSS, Angular, Zustand, shadcn/ui, MUI, HTML, CSS

Backend Node.js, Go, Hono, FastAPI, REST API Design, BullMQ, Celery

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, AWS S3, Coolify, CI/CD

Databases PostgreSQL, MongoDB, Supabase, Prisma, Drizzle ORM, Knex
