

EASHAH EMAAN BAJWA

Front-End Developer | React • Next.js • TypeScript

📞 03140947607 @ebajwa.bsccs22seecs@seecs.edu.pk 🌐 <https://github.com/eashah-uwu>

SUMMARY

Front-End Developer with strong experience building scalable SaaS platforms using React, Next.js, and TypeScript. Skilled in developing clean, high-performance, mobile-friendly interfaces from scratch and integrating complex APIs into production applications. Experienced in working across fast-paced startup environments, collaborating with global teams, and delivering end-to-end features across frontend systems, dashboards, and enterprise web applications. Strong understanding of modern frontend architecture, state management, performance optimization, and user-focused product development.

EXPERIENCE

Golang Backend Developer

Ibanera LLC

📅 01/2026 - Present 📍 Location

- Developed and maintained backend services using Golang, supporting 20+ fintech products at Ibanera LLC.
- Optimized transaction routing system, improving performance to handle 5+ intermediary routes.

Software Engineer (Remote)

Bitsmiths Studios

📅 09/2024 📍 Wyoming, USA

- Built and shipped **5+ production** web applications using **Next.js, React,** and **TypeScript**, including a CMS platform, social-media style app with video calling, Pinterest-style marketplace, and service business platforms
- Developed **pixel-perfect**, mobile-first frontend systems from Figma designs, maintaining sub-2s load times across core user flows
- Integrated** Stripe, PayPal, Twilio, and Yoti for payments, messaging, identity verification, and onboarding workflows handling 10,000+ monthly transactions
- Implemented fintech and communication integrations including Stripe, PayPal, Twilio, and Yoti
- Implemented live chat, realtime updates, and video calling using Supabase Realtime and Twilio, improving user engagement and platform usability
- Improved frontend maintainability and performance using **React Query** and **Zustand** for state management, reducing unnecessary API calls and improving responsiveness across **complex user dashboards**
- Built reusable frontend systems and Directus CMS workflows, enabling non-technical teams to manage dynamic content independently
- Collaborated with **global remote teams** across product, design, and engineering using Agile workflows, Git, and fast release cycles to deliver production-ready SaaS features under tight deadlines

Frontend Software Engineer

GoSaas Labs

📅 06/2024 - 08/2024 📍 Lahore

- Developed the frontend for a centralized reporting microservice serving multiple SaaS products, handling complex tables, exports, filtering, and server-side pagination across large datasets
- Built **scalable dashboards** and reporting interfaces improving data accessibility by 40% across teams
- Implemented robust frontend validation using **React Hook Form** and **Zod** for reliable enterprise workflows
- Optimized large-table rendering and dashboard performance using **Recharts**, improving usability for high-volume reporting workflows
- Worked closely with backend teams integrating APIs, task queues, and cloud-based reporting systems

Front-End Web Developer

AI Raheem Technologies

📅 09/2023 - 12/2023 📍 Islamabad

- Built Angular-based interfaces for a lift management platform supporting operational tracking, maintenance workflows, and service reporting
- Developed responsive dashboards and workflow screens, improving usability across desktop and mobile devices
- Improved interface usability and **mobile responsiveness** across operational dashboards

EDUCATION

Bachelor of Science

National University of Science and Technology

📍 Islamabad

KEY ACHIEVEMENTS

Web Applications Lead

Led development of two web applications, increasing company productivity by 30%.

Payment Integrations

Streamlined payment integrations, handling over 10,000 secure transactions monthly.

Reporting System Dev

Implemented reporting system, improving data accessibility by 40% across teams.

Recruiter Dashboards

Built recruiter dashboards, increasing analysis efficiency by 25% for users.

SKILLS

Languages

HTML5, CSS3, JavaScript (ES6+), TypeScript.

Metaframeworks and Libraries

React.js, Next.js

State Management

Redux, Zustand, Context API

CSS Frameworks

Tailwind, MUI, Shadcn/ui

Data Fetching

React Query, Tanstack Query

Tools & Workflow

Git, GitHub, npm, Chrome DevTools, Webpack

Performance and Optimization

Responsive Design, Mobile-First approach, SEO principles

PROJECTS

HireSens

📅 02/2024 - 03/2024 📍 Islamabad

Full-stack platform for analyzing video interviews

- Built a Next.js + FastAPI full-stack platform to analyze candidate video interviews using OpenAI Whisper and custom CNN models, with Celery for asynchronous processing
- Implemented webcam capture, automatic uploads, Supabase Realtime updates, and role-based onboarding using Supabase Auth
- Developed recruiter dashboards with Recharts, providing interactive analytics and real-time insights on candidate performance

WaveGen

📅 02/2024 - 03/2024 📍 Islamabad

Tool for procedural image generation

- Developed an interactive procedural image generation tool using React.js and p5.js, allowing users to control generation parameters and tile configurations
- Implemented the Wave Function Collapse algorithm with backtracking for constraint-based generation, enabling persistent state management and map/layout creation for game designers and digital artists
